Frameworks/Libraries: React.js, Next.js, FastAPI, Node.js, Express.js, Angular

Tools/Technologies: AWS, Git/GitHub, CI/CD, Agile/Scrum, REST APIs, OAuth 2.0, Auth0

Databases: PostgreSQL, MongoDB

PROFESSIONAL EXPERIENCE

Rocket | *Software Engineering Intern* | Detroit, MI

May 2026-Present

- Migrated password reset and email verification flows into Rocket's internal admin panel using **Next.js** and **TypeScript**, integrating Auth0 REST APIs to serve **1,000+** internal users
- Shipped production features in **Angular**, **Next.js**, and **TypeScript** via **CI/CD** with code review and automated testing
- Re-engineered **25+** UI components during migration to Nova, Rocket's internal design system
- Identified and resolved **5+** production UI bugs, refactoring form submission logic to eliminate data inconsistencies

Jetzy | *Full-Stack Developer Intern* | Remote

Sep 2025-Dec 2025

- Optimized MongoDB queries with pagination and indexing, reducing page load times by **~15%**
- Developed responsive, accessible web pages for **4,000+** users using **React**, **Next.js**, and **TailwindCSS**
- Implemented OAuth 2.0 authentication with **Node.js** server-side routes, securing login flows and protected REST API endpoints
- Translated product requirements into **12+** production-ready full-stack components

AccelerateKID | *Lead Tech Ed Instructor Intern* | Novi, MI

Mar 2025-Sep 2025

- Instructed **100+ students** (grades 4–9) in Python, JavaScript, and Java, achieving a **99%** project completion rate
- Adapted quickly to new technologies and delivered structured lessons across multiple programming domains
- Provided real-time debugging support, code reviews, and technical feedback to improve student outcomes

PROJECTS

AWS Document Processing Pipeline | *Python, AWS (S3, Lambda, Textract, SQS), Terraform*

- Designed and built a serverless document processing pipeline in Python that ingests files through S3, triggers Lambda functions, and extracts text with Textract
- Decoupled processing stages with SQS queues, isolating failures and enabling automatic retries
- Provisioned infrastructure as code with Terraform, configuring VPC networking and least-privilege IAM policies

Gig Driver Peak Time Optimizer (Hackathon Award Winner) | *Next.js, FastAPI, MongoDB, Base44 AI*

- Won Best Use of Base44 AI with a full-stack analytics platform that identifies peak revenue windows from multi-dimensional gig-driver earnings data
- Engineered a **FastAPI** pre-aggregation service serving real-time insights to a **Next.js + TypeScript** dashboard in **<200ms**
- Designed data pipelines and prompts for an AI recommendation engine, converting earnings data into scheduling guidance

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Capital One Tech Summit | *Summit Participant* | Plano, TX

May 2026

- Hand-selected as 1 of 35 students nationwide for Capital One's invite-only, week-long tech summit at its Texas headquarters
- Participated in technical workshops and engineering panels led by Capital One engineers and leaders

Management Leadership for Tomorrow | *Career Prep Fellow*

Nov 2025-Present

- Selected for a competitive 18-month program preparing high-achieving students for top-tier tech and business roles
- Engaged with partners, including Capital One, Adobe, and PNC Bank, on technical and career development

National Society of Black Engineers | *Vice President* | Ypsilanti, MI

Apr 2025-Present

- Analyzed engagement data to improve outreach strategies and increase participation in technical events to **100+ attendees**
- Organized professional development programs and industry-facing events for underrepresented students
